

# JNMT Author Guidelines

## Editorial Policy

The *Journal of Nuclear Medicine Technology* publishes original scientific articles, case reports, commentaries, teaching editorials, letters to the editor, and invited continuing education articles.

## Manuscript Submission

Submit all manuscripts to the *JNMT* Editor:

Susan C. Weiss, CNMT  
Division of Nuclear Medicine  
Children's Memorial Hospital  
2300 Children's Plaza  
Chicago, IL 60614  
(312) 880-4416

## Copyright

In compliance with the Copyright Revision Act of 1976, effective January 1, 1978, the following written statement must accompany all submissions: "Upon acceptance by the *Journal of Nuclear Medicine Technology*, all copyright ownership of the article (complete title of the article in this space) is transferred to The Society of Nuclear Medicine. On behalf of any and all co-authors, I accept the responsibility for release of any part or all of the material contained within the article noted above. The undersigned stipulates that the material submitted to the *Journal of Nuclear Medicine Technology* is original and has not been submitted to another publication for concurrent consideration." Copyright requirement does not apply to work prepared by United States government employees as part of their official duties.

## Manuscript Format

- Submit four complete copies (one original and three copies) of the manuscript and three sets of 5 × 7 in. glossy illustrations.
- Type each page *double-spaced* on nonerasable white bond paper leaving a 2-inch margin on all sides.
- The order of manuscript components is: title page, abstract, text, notes, acknowledgments, references, tables (each on a new page), and legends for illustrations.
- Begin paragraphs with an indentation of at least five spaces.
- Number all pages at the top right-hand side.
- Do not make handwritten changes.
- Use generic names. Manufacturers of instruments or radio-pharmaceuticals should not be named in the manuscript unless their inclusion is absolutely essential to the content. When necessary, manufacturers should be identified by footnotes.
- Figures, tables, and references are cited consecutively within the text.

## Original scientific articles should include the following sections:

### Title Page

The title should be as short as possible, with a maximum of 72 characters including spaces. The title page should include:

the first and last names of all authors; departmental and institutional affiliations of all authors; and complete mailing address, telephone number, and zip code of the author responsible for correspondence and reprints.

### Abstract

The abstract must be limited to one paragraph of 150 words or less and typed on a separate page.

### Introduction

State the purpose of the investigation, any necessary background facts, and the current relevance of the work.

### Materials and Methods

Describe the materials used and experimental procedures that are important to understand the significance of the results.

### Results and Discussion

In general, these are separate sections. Present *results* in a logical sequence. Do not duplicate information given in tables or figure legends. The results are interpreted in the *discussion*. Present limitations of the research method or the materials in the discussion section; hypotheses based on the results are also suggested here.

### Notes

Type notes *double-spaced* after the Discussion. Consecutive order of footnote symbols is: \*, †, ‡, §, ¶.

### Acknowledgments

Acknowledge people or agencies who have contributed substantially to the work, as well as grant support.

### References

Type references *double-spaced* on a separate sheet, numbered consecutively as they are cited in the text. Style for references cited in *JNMT* is as follows: abbreviate journal names according to the *List of Journals Indexed in Index Medicus*; list all authors when six or less—when six or more list first three and add et al.; write out complete page numbers. For example:

#### Journal article:

Starling MR, Dell'Italia LJ, Walsh RA, et al. Accurate estimates of absolute left ventricular volumes from equilibrium radionuclide angiographic count data using a simple geometric attenuation correction. *J Am Coll Cardiol* 1984;3:789-798.

#### Book:

Sorenson JA, Phelps ME. *Physics in Nuclear Medicine*. 2nd ed. Orlando, FL: Grune and Stratton, 1987:239-247.

#### Article or chapter in a book:

Nusynowitz ML, Lull RJ. Modulation transfer function. In: Early PJ, Razzak MA, Sodee DB, eds. *Textbook of*
