

Editorial Policy

The *Journal of Nuclear Medicine Technology* publishes original scientific articles, commentaries, editorials, and letters to the editor.

Manuscript Submission

Submit all manuscripts to the JNMT Editor: Susan C. Weiss, CNMT, Division of Nuclear Medicine, Children's Memorial Hospital, 2300 Children's Plaza, Chicago, IL 60614. (312) 880-4416.

Copyright

In compliance with the Copyright Revision Act of 1976, effective January 1, 1978, the following written statement must accompany all submissions: "Upon acceptance by the *Journal of Nuclear Medicine Technology*, all copyright ownership of the article (complete title of the article in this space) is transferred to The Society of Nuclear Medicine. On behalf of any and all co-authors, I accept the responsibility for release of any part or all of the material contained within the article noted above. The undersigned stipulates that the material submitted to the *Journal of Nuclear Medicine Technology* is original and has not been submitted to another publication for concurrent consideration." Copyright requirement does not apply to work prepared by United States government employees as part of their official duties.

Manuscript Format

- Submit the manuscript on a 3½ inch, high density, floppy disk in WordPerfect 5.1 and provide one complete hard copy of the manuscript. Submit three sets of 5 × 7 inch glossy illustrations.
- Type each page *double-spaced* on nonerasable white bond paper leaving a 2-inch margin on all sides.
- The order of components is: title page, abstract, text, acknowledgments, references, tables, and figure legends.
- Begin paragraphs with an indentation of at least five spaces.
- Number all pages at the top right-hand side.
- Do not make handwritten changes.
- Use generic names. *Manufacturers of instruments or radio-pharmaceuticals should not be named in the manuscript unless their inclusion is absolutely essential to the content.* If a product's brand name is used, put the name, city, and state of the manufacturer in parentheses after the product name.
- Cite figures, tables, and references consecutively within the text.

Original scientific articles should include: Title Page

The title should be as short as possible, with a maximum of 72 characters including spaces. The title page should include:

the first and last names of all authors; departmental and institutional affiliations of all authors; and complete mailing address, telephone number, and zip code of the author responsible for correspondence and reprints.

Abstract

The abstract should be typed on a separate page and should not exceed 150 words. The following headings should be included in the abstract: *Objective, Methods, Results, and Conclusions.* After each heading, write a brief synopsis of the relevant portion of your paper.

Introduction

State the purpose of the investigation, any necessary background facts, and the current relevance of the work.

Materials and Methods

Describe the materials used and experimental procedures that are important to understand the significance of the results.

Results and Discussion

In general, these are separate sections. Present results in a logical sequence. Do not duplicate information given in tables or figure legends. The results are interpreted in the discussion section. Present limitations of the research method or the materials in the discussion section; hypotheses based on the results are also suggested here.

Acknowledgments

Acknowledge people or agencies who have contributed substantially to the work, as well as grant support.

References

Type references double-spaced on a separate sheet, numbered consecutively as they are cited in the text. Style for references cited in JNMT is as follows: abbreviate journal names according to the *List of Journals Indexed in Index Medicus*; list all authors when three or less; when four or more, list first three and add et al. Write out complete page numbers. See examples:

Journal article:

Starling MR, Dell'Italia LJ, Walsh RA, et al. Accurate estimates of absolute left ventricular volumes from equilibrium radionuclide angiographic count data using a simple geometric attenuation correction. *J Am Coll Cardiol* 1984;3:789-798.

Book:

Sorenson JA, Phelps ME. *Physics in nuclear medicine.* 2nd ed. Orlando, FL: Grune and Stratton; 1987:239-247.

Article or chapter in a book:

Nusynowitz ML, Lull RJ. Modulation transfer function. In: Early PJ, Razzak MA, Sodee DB, eds. *Textbook of nuclear medicine technology.* 3rd ed. St. Louis, MO: C.V. Mosby; 1979:283-291.
