## INTRODUCING THE MOST UP-TO-DATE SELF- ASSESSMENT PROGRAM ON INSTRUMENTATION

*Nuclear Medicine Self-Study Program II: Instrumentation* is the most current and comprehensive self-assessment program on this vital topic available today. With more than 35 pages devoted to questions, answers and critiques, this program is an essential tool for reviewing and upgrading your skills or preparing for board certification.

*Topics Include—*

- Nonimaging Instrumentation
- Anger Scintillation Cameras
- Multiple-Element Scintillation Camera
- Effect of Camera Performance on Clinical Imaging
- Quality Control for Anger Cameras
- Emission Computed Tomographic Imaging
- Nuclear Medicine Computers, Acquisition and Processing Software and System Management

*Self-Study Program II* is the second book in the series from SNM. *Self-Study Program III: Cardiovascular Nuclear Medicine* available spring 1997. Watch for *Self-Study Program VI: Oncology* topic booklets coming soon.
