A kid with leukemia can die from a cold.

An infection that means a day in bed for a normal child is a threat to the life of a child with leukemia. Once, leukemia victims lived only a few months. Now, in some cases, we can prolong lives a few years.

But leukemia is still the major cause of disease and death in kids between the ages of 3 and 14.

We want to save every leukemia victim. We can't without a healthy contribution from you.

We want to wipe out cancer in your lifetime. Give to the American Cancer Society.
