1975 Subject Index

asterisk indicates abstract

- Abdomen**
 $^{99m}\text{TcO}_4^-$ arteriography, methodology, 141
- Albumin**, see *Iodine-131; Technetium-99m*
- Artifacts**
 breast prosthesis, 47
 teaching manual, 101*
- Audiovisual review**
Aspects of Liquid Scintillation Counting, 93
Brain Scan Examination Procedure, 94
Cerebro-Vascular Disorders, 224
Conversational Ethics for the Technologist in Nuclear Medicine, 94
Focused Collimators, 93
Nuclear Imaging Instrumentation, Parts I and II, 174
Principles of Gamma Counting, 93
Radionuclide Angiography, 175
- Blocking dose**
 perchlorate for $^{99m}\text{TcO}_4^-$ brain imaging, 138
- Blood**
 plasma volume, methodology, 141
 red cell, in vivo ^{99m}Tc tagging, 91
 red cell volume, methodology, 141
 red cell volume, ^{51}Cr method compared to in vitro fluorescent excitation analysis, 106*, 159
 studies, bibliography, 217
- Bone**
 bibliography of studies, 217
 comparison of 5:1 scanner and scintillation camera, ^{99m}Tc -diphosphonate, 43, 176, 177
 scanning, improvement, 80
 tomographic scanning, 99*
 whole-body imaging, overhead scintillation camera, 100*
- Book review**
Handbook of Biomedical Instrumentation and Measurement, 223
Handbook of Chemistry and Physics, 92
NRC Report Number 43: Review of the Current State of Radiation Protection Philosophy, 174
Nuclear Medicine, 222
Nuclear Medicine In Vitro, 92
Nuclear Medicine Technology Examination Review Book, 223
Practical Nuclear Medicine, 222
Radioassay in Clinical Medicine, 48
Radionuclide Scanning in Cyanotic Heart Disease, 222
- Brain**
 blood flow studies, methodology, 141
 cerebrovascular disorders, audiovisual program, 224
 image, $^{99m}\text{TcO}_4^-$, effect of Sn(II) in vivo, 91
 imaging, $^{99m}\text{TcO}_4^-$, perchlorate blocking dose, 138
 scan examination procedure, audiovisual program, 94
 subdural hematoma monitoring during aspiration, in child, 37
 studies, bibliography, 217
 tomographic scanning, 99*
 vertex imaging, 170
- Bromine-32**
 extracellular fluid space, 106*, 159
- Camera, image intensifier**
 functional images of left ventricle, 102*
- Camera, scintillation**
 compared to scanner, tomograph, ^{13}N -alanine pancreas imaging, 98*
 compared to 5:1 scanner, ^{99m}Tc -diphosphonate bone studies, 43, 176, 177
 facility planning, 141
 MTF, compared to scanner, 97*
 overhead, whole-body studies, 100*
 quality control procedures, 87
 renogram, time and accuracy improvement, ^{99m}Tc -DTPA, 40
 ^{201}Tl collimation, 101*
- Chromatography**
 column, testing for free $^{99m}\text{TcO}_4^-$, 98*
 paper, free $^{99m}\text{TcO}_4^-$ in ^{99m}Tc -diphosphonate, 103*
 thin layer, ^{99m}Tc -DTPA from kits, 208
- Chromium-51**
 -RBC, red cell volume, 141
 -RBC, red cell volume, compared to in vitro fluorescent excitation analysis, 106*, 159
- Cisternography**
 overhead scintillation camera, 100*
- Cobalt-57**
 -vitamin B_{12} , radioassay, 104*
- Collimator**
 characteristics, determination, 28
 focused, audiovisual program, 93
 scintillation camera, ^{201}Tl , 101*
- Computer**
 central facility planning, 141
 -image intensifier camera, functional images, left ventricle, 102*
 programs, in vitro tests, 68, 96*, 101*
- Crystal**
 NaI(Tl) , temperature change effects, 168
- Detector**
 NaI(Tl) crystal, temperature change effects, 168
- Digoxin radioimmunoassay**
 comparison of methods, 102*
 kit, quality control, 172
 kits, comparison, 96*
 methodology, 141
