1975 Subject Index

asterisk indicates abstract

- Abdomen**
 $^{99m}\text{TcO}_4^-$ arteriography, methodology, 141
- Albumin**, see *Iodine-131: Technetium-99m*
- Artifacts**
 breast prosthesis, 47
 teaching manual, 101*
- Audiovisual review**
Aspects of Liquid Scintillation Counting, 93
Brain Scan Examination Procedure, 94
Cerebro-Vascular Disorders, 224
Conversational Ethics for the Technologist in Nuclear Medicine, 94
Focused Collimators, 93
Nuclear Imaging Instrumentation, Parts I and II, 174
Principles of Gamma Counting, 93
Radionuclide Angiography, 175
- Blocking dose**
 perchlorate for $^{99m}\text{TcO}_4^-$ brain imaging, 138
- Blood**
 plasma volume, methodology, 141
 red cell, in vivo ^{99m}Tc tagging, 91
 red cell volume, methodology, 141
 red cell volume, ^{51}Cr method compared to in vitro fluorescent excitation analysis, 106*, 159
 studies, bibliography, 217
- Bone**
 bibliography of studies, 217
 comparison of 5:1 scanner and scintillation camera, ^{99m}Tc -diphosphonate, 43, 176, 177
 scanning, improvement, 80
 tomographic scanning, 99*
 whole-body imaging, overhead scintillation camera, 100*
- Book review**
Handbook of Biomedical Instrumentation and Measurement, 223
Handbook of Chemistry and Physics, 92
NRCP Report Number 43: Review of the Current State of Radiation Protection Philosophy, 174
Nuclear Medicine, 222
Nuclear Medicine In Vitro, 92
Nuclear Medicine Technology Examination Review Book, 223
Practical Nuclear Medicine, 222
Radioassay in Clinical Medicine, 48
Radionuclide Scanning in Cyanotic Heart Disease, 222
- Brain**
 blood flow studies, methodology, 141
 cerebrovascular disorders, audiovisual program, 224
 image, $^{99m}\text{TcO}_4^-$, effect of Sn(II) in vivo, 91
 imaging, $^{99m}\text{TcO}_4^-$, perchlorate blocking dose, 138
 scan examination procedure, audiovisual program, 94
 subdural hematoma monitoring during aspiration, in child, 37
 studies, bibliography, 217
 tomographic scanning, 99*
 vertex imaging, 170
- Bromine-32**
 extracellular fluid space, 106*, 159
- Camera, image intensifier**
 functional images of left ventricle, 102*
- Camera, scintillation**
 compared to scanner, tomograph, ^{13}N -alanine pancreas imaging, 98*
 compared to 5:1 scanner, ^{99m}Tc -diphosphonate bone studies, 43, 176, 177
 facility planning, 141
 MTF, compared to scanner, 97*
 overhead, whole-body studies, 100*
 quality control procedures, 87
 renogram, time and accuracy improvement, ^{99m}Tc -DTPA, 40
 ^{201}Tl collimation, 101*
- Chromatography**
 column, testing for free $^{99m}\text{TcO}_4^-$, 98*
 paper, free $^{99m}\text{TcO}_4^-$ in ^{99m}Tc -diphosphonate, 103*
 thin layer, ^{99m}Tc -DTPA from kits, 208
- Chromium-51**
 -RBC, red cell volume, 141
 -RBC, red cell volume, compared to in vitro fluorescent excitation analysis, 106*, 159
- Cisternography**
 overhead scintillation camera, 100*
- Cobalt-57**
 -vitamin B₁₂, radioassay, 104*
- Collimator**
 characteristics, determination, 28
 focused, audiovisual program, 93
 scintillation camera, ^{201}Tl , 101*
- Computer**
 central facility planning, 141

whole body, counting procedure, 23

Protocol

- bowel cleansing for ^{67}Ga -citrate studies, 106*
- perchlorate blocking dose for $^{99\text{m}}\text{TcO}_4^-$ brain imaging, 138

Quality control

- bibliography, 217
- column chromatography, free $^{99\text{m}}\text{TcO}_4^-$, 98*
- digoxin radioimmunoassay, 172
- free $^{99\text{m}}\text{TcO}_4^-$ in $^{99\text{m}}\text{Tc}$ -diphosphonate, 103*
- nuclear medicine facility planning, 141
- pipetting systems, 103*
- radioimmunoassay, 154
- scintillation camera, 87
- $^{99\text{m}}\text{Tc}$ -DTPA kits, chromatography, 208
- $^{99\text{m}}\text{Tc}$ -MAA preparation, 104*
- whole-body counter, 23

Radiation safety

- book review, 174
- comparison of ^{99}Mo - $^{99\text{m}}\text{Tc}$ generator systems, 99*
- disposal apparatus, lead shield, 45
- facility planning, 141
- film badge vs. luminescence dosimetry, 34, 175
- generator eluate volume determination, 202
- MEK extraction system, 204
- preparation for regulatory inspection, 163
- structures, 220
- syringe shield, $^{99\text{m}}\text{Tc}$, 100*
- Xe gas trapping system, 95*

Radioassay

- computer programs, 68, 101*
- serum folate, 99*
- Vitamin B_{12} , charcoal separation technique, 104*

Radioimmunoassay

- angiotensin I, 141
- bibliography, 217
- book review, 48
- computer program, 96*, 101*
- digoxin, 96*, 141, 102*, 172
- human growth hormone, 107*
- quality control, 154
- T_3 kit, 76

Radiopharmacy

- nuclear medicine facility planning, 141

Red blood cell, *see Blood*

Regulation

- licensing legislation, 48
- licensing programs, 210
- preparation for inspection, 163

Scanner, rectilinear

- compared to scintillation camera, tomograph, ^{13}N -alanine pancreas imaging, 98*
- dual-probe, bone scan improvement, 80
- facility planning, 141
- MTF, compared to scintillation camera, 97*
- 5:1, compared to scintillation camera for $^{99\text{m}}\text{Tc}$ -diphosphonate bone studies, 43, 176, 177

Scintillation camera, *see Camera, scintillation*

Sensitivity

- measurement, whole-body counter, 23

Spleen

- imaging in trauma, $^{99\text{m}}\text{Tc}$ -S colloid, 95*
- studies, bibliography, 217

Technetium-99m

- diphosphonate, comparison of scintillation camera and 5:1 scanner studies, 43, 176, 177

- diphosphonate, free $^{99\text{m}}\text{TcO}_4^-$, 103*
- disposal system, 45
- DTPA, kit preparation, chromatography, 208
- DTPA, renogram, scintillation camera, 40
- generators, radiation safety, 99*
- HSA, ECG gated left ventricular wall motion, 97*
- HSA, -transferrin, -RBC, heart studies, 141
- MAA, -microspheres, regional myocardial perfusion, 141
- MAA, preparation, 104*
- MEK extraction system, radiation exposure, 204
- microspheres, lung perfusion, 141
- microspheres, myocardial perfusion, selective coronary arteriography, 83
- microspheres, venography, 105*
- MTF of scintillation camera and scanner, 97*
- polyphosphate, bone scan improvement, 80
- polyphosphate, joint imaging in arthritis, 105*
- pyrophosphate, Sn(II) effect on $^{99\text{m}}\text{TcO}_4^-$ brain image, 91
- RBC, red cell volume, 141
- syringe shield, 100*

Technetium-99m-pertechnetate

- abdominal blood flow studies, 141
- brain imaging, effect of Sn(II), in vivo, 91
- cystography, in children, 107*
- free, chromatographic column testing, 98*
- free, in $^{99\text{m}}\text{Tc}$ -diphosphonate, 103*
- joint imaging in arthritis, 105*
- perchlorate blocking dose for brain imaging, 138

Thallium-201

- scintillation camera collimator choice, 101*

Thrombus

- $^{99\text{m}}\text{Tc}$ -microsphere venography, 105*

Thyroid

- ^{131}I uptake, whole-body retention correlation, 72
- studies, bibliography, 217

Time of study

- renogram, $^{99\text{m}}\text{Tc}$ -DTPA, scintillation camera, 40

Tin (II)

- in vivo red cell labeling, $^{99\text{m}}\text{Tc}$, 91

Tomography

- Anger rectilinear scanner, brain, bone, and ^{67}Ga -citrate scans, 99*
- ^{13}N -alanine, pancreas, 98*

Trauma

- abdominal, liver, spleen, kidney studies, 95*

T_3

- serum, radioimmunoassay, kit, 76

Urinary tract

- overhead scintillation camera studies, 100*
- $^{99\text{m}}\text{TcO}_4^-$ cystography, in children, 107*

Vascular system

- radionuclide arteriography and venography, methodology, 141
- $^{99\text{m}}\text{Tc}$ -microspheres, venography, 105*

Vitamin B_{12}

- radioassay, charcoal separation technique, 104*

Whole body

- bone scanning, tomographic, 99*
- counter, quality control, 23
- ^{67}Ga -citrate tomographic scanning, 99*
- studies, overhead scintillation camera, 100*

Xenon-133

- gas, administration through respirator, 105*
- gas, lung ventilation, 141
- gas, trapping system, 95*
- in saline, regional lung perfusion, 141
- in saline, regional myocardial blood flow, 141
