

Directory of Accredited Nuclear Medicine Technology Programs

The directory of accredited programs identifies those programs that have met or exceeded the *Accreditation Standards for Nuclear Medicine Technologist Education*. These programs have voluntarily undergone a peer review process established by the JRCNMT. Programmatic accreditation by the JRCNMT provides assurance to applicants that the program delivers education based on recognized professional standards. For a program listing that includes program Web sites and contact information, go to <http://www.jrcnmt.org> and select the "Find a Program" link.

EDUCATIONAL PROGRAMS

Length

The professional portion of most nuclear medicine technology programs is 1 to 2 years in length. Institutions offering accredited programs may provide an integrated educational sequence leading to an associate or baccalaureate degree over a period of 2 or 4 years.

Programs vary in length depending on the admission criteria. Some programs admit students directly from high school; others require prior higher education for entrance.

Prerequisites

Applicants for admission must have graduated from high school or the equivalent and have completed postsecondary courses in human anatomy and physiology with laboratory, general physics, college algebra, chemistry with laboratory, oral and written communications, medical terminology, social sciences, and humanities.

Curriculum

The accredited curriculum includes methods of patient care, cross-sectional anatomy, nuclear medicine statistics, nuclear medicine and radiation physics, radiation biology, radiation safety and protection, nuclear medicine instrumentation, quality control and quality assurance, computer applications for nuclear medicine, diagnostic nuclear medicine procedures, immunology, radionuclide therapy, PET, CT, radionuclide chemistry and radiopharmacy, medical ethics and law, health-care administration, health sciences research methods, medical informatics, and pharmacology.

Standards

Accreditation standards are minimum educational standards against which programs are evaluated. Each new program is assessed in accordance with the standards, and

accredited programs are periodically reviewed to determine whether they remain in substantial compliance. The standards are available on the Web site at <http://www.jrcnmt.org>.

Inquiries

Requests for information on program accreditation, including the standards, preparing the self-study report, and arranging a site visit, may be addressed to:
