JNMT
1980 Subject Index

Abdomen
Multiple radiopharmaceutical approach to situs inversus, 118
Accessory, imaging
Accessory for estimating organ size from gamma camera images, 211
Accreditation
Nuclear medicine technology programs accredited by Joint Review Committee, 100
Accuracy
Interobserver variability in left ventricular ejection fraction calculation from equilibrium gated blood pools, 122
Radionuclide assessment of right ventricular ejection fraction using pre-processed multiple gated equilibrium scintigraphy, 122
Artifact
Delineated radiocolloid hepatic "hot spot" with superior vena caval obstruction, 30
Determining cause of NaI crystal breakage, 44
Effect of technetium-99m on a computerized tomography scan, 231
Significance of photon-deficient areas in radionuclide bone scans, 208
Bar pattern
Evaluation of three different pinhole apertures for large field of view cameras, 125
Blood compatibility
In vivo cross match using Cr-51 labeled red blood cells, 127
Retrospective look at in vivo cross match, 127
Blood pool imaging
Cost control and effective utilization of tin pyrophosphate for high quality blood pool scintigraphy, 128
Blood pool scan
In vivo labeling of Tc-99m-pyrophosphate to red blood cells, 127
Bone
Extra-pulmonary accumulation of xenon-133 gas, 158
Knee osteonecrosis—study of 8 cases and review of literature, 124
Magnification scintigraphy—improved detection and localization of bony abnormalities in back and hip pain, 123
Significance of photon-deficient areas in radionuclide bone scans, 208
Bone, blood pool
Three phase orthopedic bone scanning, 124
Bone marrow
Extra-pulmonary accumulation of xenon-133 gas, 158
Bone, metabolic disease
Quantitation of 24 hour skeletal uptake of Tc-99m MDP—new approach, 124
Bone, necrosis
Quantification of aseptic bone necrosis in lupus patients, 124
Bone, radionuclide angiogram
Quantitation of 24 hour skeletal uptake of Tc-99m MDP—new approach, 124
Book review
An Introduction to Radiation Dosimetry, 51
Cardiac Nuclear Medicine, 178
Fundamentals of Nuclear Pharmacy, 120
Human Anatomy and Physiology, 178
ICRU Report 32: Methods of Assessment of Absorbed Dose in Clinical Use of Radionuclides, 241
ICRU Report 33: Radiation Quantities and Units, 241
Medical Imaging Techniques, 50
NCRP Report No. 58: A Handbook of Radioactivity Measurements and Procedures, 50
Nuclear Medicine for the General Physician, 120
Nuclear Medicine in Urology and Nephrology, 241
Nuclear Medicine Review Syllabus, 120
Radiopharmaceuticals II: Proceedings of the Second International Symposium on Radiopharmaceuticals, 178
Textbook of Nuclear Medicine: Clinical Applications, 50
The Heritage of Nuclear Medicine, 50
Breast
Internal mammary lymphoscintigraphy: a technical viewpoint, 203
Camera, accessory
Determination of left ventricular ejection fraction with noncomputerized cardiac module, 121
Camera, mobile
Cardiac tomography using rotating slant hole collimator and portable camera, 121
Camera, scintillation
Accessory for estimating organ size from gamma camera images, 211
A small scintillation camera for imaging in one dimension, 213
Gamma camera image recording on video cassette, 216
Camera, single-pass collimator
Quantitation of 24 hour skeletal uptake of Tc-99m MDP—new approach, 124
Cardiac module
Determination of left ventricular ejection fraction with noncomputerized cardiac module, 121
Cerebrospinal fluid spaces
Radionuclide ventriculography, 127
Chromatography
Design and validation of a radiochromatogram scanner with analog and digital output, 222
Chromium-51
In vivo cross match using Cr-51 labeled red blood cells, 127
Retrospective look at in vivo cross match, 127
Washing red blood cells, 127
Clinical evaluation
Multiple radiopharmaceutical approach to situs inversus, 118
Collimator, pinhole
Evaluation of three different pinhole apertures for large field of view cameras, 125
Collimator, slant hole
Cardiac tomography using rotating slant hole collimator and portable camera, 121
Computer
A simple inexpensive technique for making slides, 233
Improved hard copy images with computer driven video image formatter, 124
Production of dynamic persistence displays using a computer, 162
Radionuclide first transit and R-wave synchronized imaging: determining left ventricular ejection fraction with contrast angiography, 155
Crystal
Determining cause of NaI crystal breakage, 44
Data processing
Effect of technetium-99m on a computerized tomography scan, 231
Gamma camera image recording on video cassette, 216
Multichannel analyzer interface for rectilinear scanner, 97
Production of dynamic persistence displays using a computer, 162
Radionuclide first transit and R-wave synchronized imaging: determining left ventricular ejection fraction with contrast angiography, 155
Departmental operations
Demographic study of graduates from NMT training program, 47
Nuclear medicine technologists—where have they gone? 244 (le)
Nuclear medicine technologists—where have they gone? (reply), 244 (le)
Nuclear medicine technologists—where have they gone? (reply), 245 (le)
Systematic procedure for radioactive waste disposal, 40
Display, color
A simple inexpensive technique for making slides, 233
Ear
Ventilation and clearance of sinus and middle ear using xenon-133, 23
Editorial
Choice critics, 85
Judging a book by its cover... 21
On writing well—and topically, 154
Reporting on government affairs, 202
Education
A simple inexpensive technique for making slides, 233
Cardiovascular nuclear medicine in CCU, 121
Delineated radiocolloid hepatic "hot spot" with superior vena caval obstruction, 30
Demographic study of graduates from NMT training program, 47
Interobserver variability in left ventricular ejection fraction calculation from equilibrium gated blood pools, 122
JNMT style manual, 168
Multiplane tomographic imaging of pancreas, 28
Nuclear medicine technologists—where have they gone? 244 (le)
Nuclear medicine technologists—where have they gone? (reply), 244 (le)
Nuclear medicine technologists—where have they gone? (reply), 245 (le)
Nuclear medicine technology programs accredited by Joint Review Committee, 100
Ejection fraction
Radionuclide first transit and R-wave synchronized imaging: determining left ventricular ejection fraction with contrast angiography, 155

Film
A simple inexpensive technique for making slides, 233
Film processing
Flood replenishment for nuclear medicine film processors, 125
Flood field
Flood images under clinical conditions, 57 (le)
Uniformity correction circuitry: effects of extraneous acquisition errors, 125
Fluorine-18-fluorodeoxyglucose
Quantitative scanning technique using positron computed tomography, 123
Gastrointestinal tract
Modification of the Schilling test for pediatric studies, 165
Gastrointestinal tract, gastric emptying
Technique of dual radionuclide gastric scintigraphy (liquid-solid gastric radionuclide emptying), 126
Government regulations
Proposed federal regulations affecting nuclear medicine technologists, 243 (le)
Proposed federal regulations affecting nuclear medicine technologists (reply), 243 (le)
Heart
Cardiovascular nuclear medicine in CCU, 121
Radionuclide first transit and R-wave synchronized imaging: determining left ventricular ejection fraction with contrast angiography, 155
Heart, positioning
Method for obtaining reproduceable thallium myocardial tomograms, 122
Positioning for 7 pinhole cardiac tomography, 122
Predicting anatomic location of coronary artery obstruction by quantitative stress thallium scintigraphy, 122
Hemorrhage, gastrointestinal
Detection and localization of active GI hemorrhage with Tc-99m sulfur colloid, 125
Scanning for GI bleeding with Tc-99m-sulfur colloid, 126
Hepatobiliary system
Multiple radiopharmaceutical approach to situs inversus, 118
Image recording
Gamma camera image recording on video cassette, 216
Images, hard copy
Improved hard copy images with computer driven video image formatter, 124
Images, video format
Improved hard copy images with computer driven video image formatter, 124
Indium-111-DTPA
Radionuclide ventriculography, 127
Technique of dual radionuclide gastric scintigraphy (liquid-solid gastric radionuclide emptying), 126
Instrumentation
A small scintillation camera for imaging in one dimension, 213
Design and validation of a radiochromatogram scanner with analog and digital output, 222
Determining cause of NaI crystal breakage, 44
Gamma camera image recording on video cassette, 216
Multichannel analyzer interface for rectilinear scanner, 97
In vivo cross match
In vivo cross match using Cr-51 labeled red blood cells, 127
In vivo labeling
Cost control and effective utilization of tin pyrophosphate for high quality blood pool scintigraphy, 128
In vivo labeling of Tc-99m-pyrophosphate to red blood cells, 127
Iodine-125
A small scintillation camera for imaging in one dimension, 213
Iodine-131
Hazards of I-131 use, 57 (le)
Hazards of I-131 use (reply), 57 (le)
Precaution for minimizing radiation exposure from iodine vaporization, 90
Iodine-131-iodohippurate
Cost control and effective utilization of tin pyrophosphate for high quality blood pool scintigraphy, 128
Joint
Significance of photon-deficient areas in radionuclide bone scans, 208
Kidney
Production of dynamic persistence displays using a computer, 162
Kidney, glomerular filtration rate
Clinically proven technique for determination of effective renal plasma flow and glomerular filtration rate, 128
Kidney, renal plasma flow
Clinically proven technique for determination of effective renal plasma flow and glomerular filtration rate, 128
Left ventricular ejection fraction
Determination of left ventricular ejection fraction with noncomputerized cardiac module, 121
Interobserver variability in left ventricular ejection fraction calculation from equilibrium gated blood pools, 122
Left ventricular wall motion
Determination of left ventricular ejection fraction with noncomputerized cardiac module, 121
Licensing
Demographic study of graduates from NMT training program, 47
Nuclear medicine technologists—where have they gone? 244 (le)
Nuclear medicine technologists—where have they gone? (reply), 244 (le)
Nuclear medicine technologists—where have they gone? (reply), 245 (le)
Liver
Accessory for estimating organ size from gamma camera images, 211
Delineated radiocolloid hepatic "hot spot" with superior vena caval obstruction, 30
Multiple radiopharmaceutical approach to situs inversus, 118
Liver, perfusion mapping
Hepatic perfusion mapping using Tc-99m-MAA, 126
Lung
Extra-pulmonary accumulation of xenon-133 gas, 158
Methodology for preparing pediatric dose of Tc-99m MAA for pulmonary perfusion studies, 94
Tc-99m MAA: desired number of particles for pulmonary perfusion studies, 33
Lymph node
Internal mammary lymphoscintigraphy: a technical viewpoint, 203
Molybdenum-99
Systematic procedure for radioactive waste disposal, 40
Nitrogen-13-ammonia
Quantitative scanning technique using positron computed tomography, 123
NMT training programs
Nuclear medicine technology programs accredited by Joint Review Committee, 100
Osteonecrosis, etiologic factors
Knee osteonecrosis—study of 8 cases and review of literature, 124
Pancreas
Multiplane tomographic imaging of pancreas, 28
Particles
Tc-99m MAA: desired number of particles for pulmonary perfusion studies, 33
Patient care
The phantom patient, 177
Patient communications
Hazards of I-131 use (reply), 57 (le)
Internal mammary lymphoscintigraphy: a technical viewpoint, 203
The phantom patient, 177
Patient position
Cardiovascular nuclear medicine in CCU, 121
Quantification of aseptic bone necrosis in lupus patients, 124
Pediatric dose
Methodology for preparing pediatric dose of Tc-99m MAA for pulmonary perfusion studies, 94
Pediatrics
Modification of the Schilling test for pediatric studies, 165
Phantom
Accessory for estimating organ size from gamma camera images, 211
Cardiac tomography using rotating slant hole collimator and portable camera, 121
Evaluation of three different pinhole apertures for large field of view cameras, 125
Flood images under clinical conditions, 57 (le)
Planning
Long-range planning—past, present, and future, 235
Plasma aluminum levels, circulating
Circulating aluminum effect on biodistribution of Tc-99m-Sn-diphosphonate in rats, 160
Pulmonary embolism
Venography technique for detection of DVT, 123
Quality control
Circulating aluminum effect on biodistribution of Tc-99m-Sn-diphosphonate in rats, 160
Design and validation of a radiochromatogram scanner with analog and digital output, 222
Determining cause of NaI crystal breakage, 44
Distribution of unbound reduced technetium-99m in animals, 37
Effect of technetium-99m on a computerized tomography scan, 231
Flood images under clinical conditions, 57 (le)
Methodology for preparing pediatric dose of Tc-99m MAA for pulmonary perfusion studies, 94
Tc-99m MAA: desired number of particles for pulmonary perfusion studies, 33
Radiation reduction techniques
1979 analysis of nuclear medicine personnel radiation monitoring data, 123
Radiation safety
A fingertip shield for safe and effective disinfection of a radiopharmaceutical vial, 228
1979 analysis of nuclear medicine personnel radiation monitoring data, 123
Hazards of I-131 use, 57 (le)
Hazards of I-131 use (reply), 57 (le)
Precaution for minimizing radiation exposure from iodine vaporization, 90
Radiation safety in nuclear medicine laboratory, 87
Systematic procedure for radioactive waste disposal, 40
Radiation therapy
Hazards of I-131 use, 57 (le)
Hazards of I-131 use (reply), 57 (le)
Precaution for minimizing radiation exposure from iodine vaporization, 90
Radioactive waste
Systematic procedure for radioactive waste disposal, 40
Radioassay
Radiation safety in nuclear medicine laboratory, 87
Radionuclide tomography
Multiplane tomographic imaging of pancreas, 28
Radionuclide ventriculography
Radionuclide ventriculography, 127
Radiopharmacy
Circulating aluminum effect on biodistribution of Tc-99m-Sn-diphosphonate in rats, 160
Methodology for preparing pediatric dose of Tc-99m MAA for pulmonary perfusion studies, 94
Tc-99m MAA: desired number of particles for pulmonary perfusion studies, 33
Red blood cell washing
Washing red blood cells, 127

Right ventricular ejection fraction
Radionuclide assessment of right ventricular ejection fraction using pre-processed multiple gated equilibrium scintigraphy, 122
Scanner
Multichannel analyzer interface for rectilinear scanner, 97
Scanner, chromatography
Design and validation of a radiochromatogram scanner with analog and digital output, 222
Schilling test
Modification of the Schilling test for pediatric studies, 165
Scientific presentations
A simple inexpensive technique for making slides, 233
Scintillation camera
Determining cause of NaI crystal breakage, 44
Flood images under clinical conditions, 57 (le)
Production of dynamic persistence displays using a computer, 162
Uniformity correction circuitry: effects of extraneous acquisition errors, 125
Ventilation and clearance of sinus and middle ear using xenon-133, 23
Scintillation camera, magnification
Evaluation of three different pinhole apertures for large field of view cameras, 125
Magnification scintigraphy—improved detection and localization of bony abnormalities in back and hip pain, 123
Scintillation camera, mobile
Cardiovascular nuclear medicine in CCU, 121
Shielding
A fingertip shield for safe and effective disinfection of a radiopharmaceutical vial, 228
Radiation safety in nuclear medicine laboratory, 87
Sinus
Ventilation and clearance of sinus and middle ear using xenon-133, 23
Spleen, autotransplant
Sequential scintigraphic evaluation of splenic autotransplant, 126
Style manual
JNMT style manual, 168
Systemic lupus erythematosis
Quantification of aseptic bone necrosis in lupus patients, 124
Technetium-99m
A small scintillation camera for imaging in one dimension, 213
Distribution of unbound reduced technetium-99m in animals, 37
Effect of technetium-99m on a computerized tomography scan, 231
Significance of photon-deficient areas in radionuclide bone scans, 208
Technetium-99m-antimony trisulfide colloid
Internal mammary lymphoscintigraphy: a technical viewpoint, 203
Technetium-99m-DTPA
Cost control and effective utilization of tin pyrophosphate for high quality blood pool scintigraphy, 128
Radionuclide ventriculography, 127
Technetium-99m-MAA
Hepatic perfusion mapping using Tc-99m-MAA, 126
Methodology for preparing pediatric dose of Tc-99m MAA for pulmonary perfusion studies, 94
Tc-99m MAA: desired number of particles for pulmonary perfusion studies, 33
Technetium-99m-MDP
Magnification scintigraphy—improved detection and localization of bony abnormalities in back and hip pain, 123
Quantification of aseptic bone necrosis in lupus patients, 124
Quantitation of 24 hour skeletal uptake of Tc-99m MDP—new approach, 124
Technetium-99m-MDP, stabilized and unstabilized
Differences between Tc-99m-MDP, stabilized and unstabilized, 127
Technetium-99m-microspheres
Venography technique for detection of DVT, 123
Technetium-99m-pyrophosphate
In vivo labeling of Tc-99m-pyrophosphate to red blood cells, 127
Technetium-99m-Sn-diphosphonate
Circulating aluminum effect on biodistribution of Tc-99m-Sn-diphosphonate in rats, 160
Technetium-99m-sulfur colloid
Detection and localization of active GI hemorrhage with Tc-99m sulfur colloid, 125
Scanning for GI bleeding with Tc-99m-sulfur colloid, 126
Sequential scintigraphic evaluation of splenic autotransplant, 126
Technique of dual radionuclide gastric scintigraphy (liquid-solid gastric radionuclide emptying), 126
Technetium-99m-sulfur colloid, heat-damaged red blood cells
Multiple radiopharmaceutical approach to situs inversus, 118
Thallium-201
Cardiac tomography using rotating slant hole collimator and portable camera, 121
Thallium-201, stress scan
Method for obtaining reproduceable thallium myocardial tomograms, 122
Positioning for 7 pinhole cardiac tomography, 122
Predicting anatomic location of coronary artery obstruction by quantitative stress thallium scintigraphy, 122
Therapy
Hazards of I-131 use, 57 (le)
Hazards of I-131 use (reply), 57 (le)
Thyroid
Hazards of I-131 use, 57 (le)
Hazards of I-131 use (reply), 57 (le)
Is the TRH stimulation test really useful? 125
Precaution for minimizing radiation exposure from iodine vaporization, 90
Thyrotropin test
Is the TRH stimulation test really useful? 125
Tomography, computerized axial
Effect of technetium-99m on a computerized tomography scan, 231
Radionuclide ventriculography, 127
Tomography, emission
Quantitative scanning technique using positron computed tomography, 123
Tomography, heart
Cardiac tomography using rotating slant hole collimator and portable camera, 121
Method for obtaining reproduceable thallium myocardial tomograms, 122
Positioning for 7 pinhole cardiac tomography, 122
Tomography, physiologic
Quantitative scanning technique using positron computed tomography, 123
Uniformity correction
Uniformity correction circuitry: effects of extraneous acquisition errors, 125
Vascular system
Production of dynamic persistence displays using a computer, 162
Venogram, lower extremity
Venography technique for detection of DVT, 123
Ventilation
Ventilation and clearance of sinus and middle ear using xenon-133, 23
Vial disinfection
A fingertip shield for safe and effective disinfection of a radiopharmaceutical vial, 228
Video cassette
Gamma camera image recording on video cassette, 216
Xenon-133
Extra-pulmonary accumulation of xenon-133 gas, 158
Ventilation and clearance of sinus and middle ear using xenon-133, 23
